

Cabinet constructed from 2cm ($\frac{3}{4}$ in) thick medium density fibreboard with melamine coating. The cabinet is available in three different colours: blue, red, butcher's block.

Legs are made from 7cm (3x3in) square steel coated with black washable powder-varnish. The tale can be set at three different height levels - respectively 82cm ($32+\frac{1}{4}$ in), 85cm ($33+\frac{1}{2}$ in), 88cm ($34+\frac{3}{4}$ in) - by means of a simple mechanism placed inside each leg which can be operated manually and with no need for disassembling the legs.

High stress resistance machine-trued hollow steel bars - diameter 16mm - coated with anti-rust chromium-plating. The quality of the materials used adds to the thickness of 2,2mm to prevent the bars from bending: they maintain a perfect shape for a long time. It is possible to choose between the going-through (also called solid) bars and the telescopic type.

Going-through bars: the standard bars protrude from the cabinet - at the handle opposite side - to follow the international competition standard, which is also used in many countries worldwide.

Safety device (telescopic bars): on request each table can be equipped with telescopic safety bars, having the same technical features as the going-through type. The difference is in the functioning, to obtain the maximum level of safety.

In telescopic bars, a smaller diameter bar glides inside the player bar, whose end does not protrude from the cabinet. This prevents dangerous strikes to the

childrens' eyes and face. Its use is strongly advised if the football table is meant for children and in the event that the table must be put in a location attended by children.

Bars are fixed to the cabinet by means of nylon ball bearings.

The steel roller bearings inside the bearings fixing bars to the cabinet greatly improve the game speed, while reducing the stress for the players' wrists.

One-colour players in plastic material (moplen) representing a stylized human figure, directly moulded onto the bar: they do not move, cannot be displaced and maintain their positions perfectly. Teams are in colours matching the cabinet: a blue and a yellow team on the table with blue cabinet, red and yellow players for the red table, a red and a blue team with the butcher's block cabinet.

The table is available either with fully rotating (360 degrees) or non-rotating goalkeeper (180 degrees).

Playing field of green plastic laminate with silk-screen printed white lines to look like a football ground.

Balls served through a filler on each table side.

A ball basket behind each goal mouth allows easy and immediate ball retrieval.

Colour coordinated abacus scorers.

10 white “ Standard” balls supplied with the table.
