

Sturdy cabinet constructed from medium density fibreboard 2,5cm (1in) thick with melamine coating. Colour: grey oak.

Heavy duty legs made from 9cm (4x4in) square steel coated with washable powder varnish.

The leg levellers to enable a perfectly flat playfield on uneven terrains are available on request.

High stress resistance machine-trueed hollow steel bars - diameter 16mm - coated with anti-rust chromium-plating. The quality of the materials used adds to the thickness of 2,2mm to prevent the bars from bending: they maintain a perfect shape for a long time. It is possible to choose between the going-through (also called solid) bars and the telescopic type.

Going-through bars: the standard bars protrude from the cabinet - at the handle opposite side - to follow the international competition standard, which is also used in many countries worldwide.

Safety device (telescopic bars): on request each table can be equipped with telescopic safety bars, having the same technical features as the going-through type. The difference is in the functioning, to obtain the maximum level of safety.

In telescopic bars, a smaller diameter bar glides inside the player bar, whose end does not protrude from the cabinet. This prevents dangerous strikes to the childrens' eyes and face. Its use is strongly advised if the football table is meant for children and in the event that the table must be put in a location attended by children.

Bars are fixed to the cabinet by means of nylon ball bearings.

The steel roller bearings inside the bearings fixing bars to the cabinet greatly improve the game speed, while reducing the stress for the players' wrists.

One-colour players in plastic material (moplen) representing a stylized human figure, directly moulded onto the bars: they do not move, cannot be displaced and maintain their positions perfectly. Colours: red and blue.

Playing field in choice of transparent glossy glass, non-reflective sanded glass or plastic laminate. Glass is 5mm thick and always tempered. The silk-screen printed white lines on a green background reproduce the football ground.

The table is available either with fully rotating (360 degrees) or non-rotating goalkeeper (180 degrees).

Balls served through a filler on each table side.

Quick and easy ball recovery through an exit behind each goal.

Quick and easy ball recovery through an exit behind each goal.

10 white "Standard" balls supplied with the table.
