

Cabinet manufactured in 20 mm thick water-proof plywood covered with plastic laminate using a special water-proof glue for perfect sealing. Colour: blue with silver edges and logo.

Metal legs coated with water-resistant powder varnish. The legs fold below the cabinet.

High stress resistance machine-trueed hollow steel bars - diameter 16mm - coated with a three-layer anti-rust chromium-plating. The quality of the materials used adds to the thickness of 2mm to prevent the bars from bending: they maintain a perfect shape for a long time. It is possible to choose between the going-through (also called solid) bars and the telescopic type.

Going-through bars: the standard bars protrude from the cabinet - at the handle opposite side - to follow the international competition standard, which is also used in many countries worldwide.

Safety device (telescopic bars): on request each table can be equipped with telescopic safety bars, having the same technical features as the going-through type. The difference is in the functioning, to obtain the maximum level of safety.

In telescopic bars a smaller diameter bar glides inside the player bar, whose end does not protrude from the cabinet. This prevents dangerous strikes to the childrens' eyes and face. Its use is strongly advised if the football table is meant for children and in the event that the table must be put in a location attended by children.

One-colour players in plastic material (moplen) representing a stylized human figure, directly moulded onto the bars: they do not move, cannot be displaced and maintain their positions perfectly. Teams are in colours matching the cabinet: grey and blue.

Bars are fixed to the cabinet by means of nylon ball bearings.

The anti-rust stainless steel roller bearings inside the bearings fixing bars to the cabinet greatly improve the game speed, while reducing the stress for the players' wrists.

Playing field in grass green plastic laminate glued using special water-proof glues. The white lines reproducing the football ground are silk-screen printed using a special ink: they do not fade under the sun nor are damaged by dampness.

Balls served through a filler on each table side.

Quick and easy ball recovery through an exit behind each goal.

Colour coordinated abacus scorers.

10 white □Standard□ balls supplied with the table.
